1. Objective and Scope of Verification

Japan Management Association GHG Certification Center (JMACC) was commissioned by TAKARA HOLDINGS INC. (hereinafter, referred to as “the Organization”) to conduct independent verification on a limited level of assurance. The scope of verification is the following greenhouse gas (GHG) emissions within the domestic organizations (hereinafter, referred to as “Organizational boundary^{*1}”) in its fiscal year 2022 Monitoring Report (hereinafter, referred to as “the Report”) from 1 April 2022 to 31 March 2023.

- 1) SCOPE 1 GHG emissions;
 - Direct CO₂ emissions within the Organizational boundary by using city gas, LPG, LNG, gasoline, light oil and A type heavy oil
 - GHG emissions of CH₄, N₂O and HFC within the Organizational boundary
- 2) SCOPE 2 GHG emissions;
Indirect CO₂ emissions within the Organizational boundary by using electricity
- 3) SCOPE 3 GHG emissions;
CO₂ emissions within the category 1, 2, 3, 4, 5, 6, 7, 9, 12 and 13 of SCOPE 3^{*2}

The objective of this verification is to confirm that the monitoring data in the Organization’s applicable scope have been correctly calculated and reported in line with the criteria of the monitoring procedure^{*3}, and to express our views as a third party. The Organization’s responsibility is to prepare the Report and report the monitoring data, and JMACC’s responsibility is to express our views on the monitoring data of the Report as a third party.

2. Procedure of Verification

The Report was verified by JMACC in accordance with requirement of ISO14064-3:2019 (Greenhouse gases Part 3: Specification with guidance for the verification and validation of greenhouse gas statements), and following processes were implemented:

- Assessment regarding to the information to specify the GHG emissions in the Report, monitoring procedure, monitoring system, and related documents
- Interviews with persons in charge of preparing the Report
- Verifying the evidence for confirmation of the accuracy of GHG emissions by sampling

3. Conclusion of Verification

Within the scope of the verification activities employing the methodologies mentioned above, nothing has come to our attention that caused us to believe that the Organization's GHG emissions in the Report were not calculated and reported in conformance with the criteria.
